7th Symposium on Accounting Research

« Accounting and digitalisation »

Monday December 11, 2017
from 9 am to 6 pm

Pierre Mendès-France conference center
139, rue de Bercy - 75012 Paris

This symposium on accounting research will gather together academics, international standard setting representatives, finance and accounting directors, chartered accountants and external auditors around series of round tables on the accounting challenges linked to the technological evolutions and the digitalisation of the economy. In particular, debates will deal with how such evolutions may impact our current accounting and financial rules and if these rules remain relevant to assess understandability and performance of the digital businesses. This symposium will also be the opportunity to come-back on the Conceptual frameworks and Performance themes respectively discussed in 2015 and 2016.

The detailed programme will be available soon.

Participation in the symposium is free, registration is mandatory.
